PSIcontrol – Comprehensive System Engineering (SKUSADM2)

This training is intended for system administrators, with the goal to provide an insight into the system technology and handling of PSIcontrol. The knowledge is imparted, that is required to independently maintain a system.

After concluding the training, participants will be able to understand the tasks of the various system components and perform error analyses. These tasks are mainly performed using the existing console tools.

Inhalt:

- Application Administration
- User Administration
- File systems and directory structure
- Databases
- Essential system services
- Logging
- Communication in PSIcontrol
- Console tools
- Troubleshooting

PSI

Duration:	2 days
Training location:	Aschaffenburg, Boschweg 6
Language:	English
Target group:	Project engineers, system administrators
Prerequisite:	UNIX and/or Linux skills PSIcontrol – System Engineering Basics (SKUSADM1)
Training materials:	Presentation slides
Min. number of participants:	4
Registration deadline:	6 weeks before start of the training
